INDEPENDENT AUDITORS' REPORT

To the Board of Commissioners Port of Hood River Hood River County, Oregon

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities and each major fund of the Port of Hood River, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Port of Hood River, as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

The Port adopted the provisions of GASB Statement No. 88 – Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements for the year ended June 30, 2019. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, and required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the management's discussion and analysis because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The budgetary comparison schedules presented as Required Supplementary Information, as listed in the table of contents, has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America, and in our opinion are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The supplementary information, as listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements.

The supplementary information, as listed in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information, as listed in the table of contents is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

The listing of board members containing their term expiration dates, located before the table of contents, has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

Reports on Other Legal and Regulatory Requirements

In accordance with Minimum Standards for Audits of Oregon Municipal Corporations, we have issued our report dated November 21, 2019 on our consideration of compliance with certain provisions of laws and regulations, including the provisions of Oregon Revised Statutes as specified in Oregon Administrative Rules. The purpose of that report is to describe the scope of our testing of compliance and the results of that testing and not to provide an opinion on compliance.

PORT OF HOOD RIVER, OREGON

Management Discussion and Analysis For the Year Ended June 30, 2019

INTRODUCTION

The Annual Financial Report consists of Management Discussion and Analysis which provides an overview of the financial performance and activities of the Port for the fiscal year ended June 30, 2019. The diagram below depicts the different components of the Annual Financial Report and their respective descriptions from the basic financial statements to those presented at the fund level which depict how the Port's financial performance compared to what was budgeted.

Financial Section Components

GOVERNMENT-WIDE STATEMENTS

The government-wide statements report financial information about the Port taken as a whole using accounting methods similar to those used by private-sector companies. The statement of Net Position includes all the Port's assets and liabilities. All the current year's revenues and expenses are accounted for in the Statement of Activities regardless of when the cash is received or paid. The two government-wide statements report the Port's Net Position and any changes. Net position – the difference between assets and liabilities – is one way to measure the Port's financial health or position.

The government-wide financial statements of the Port are divided into two categories:

Governmental funds – The Port maintains two individual governmental funds as of June 30, 2019. Both are considered major funds and are reported separately in the statement of revenues, expenditures, and changes in fund balances. The two funds are the General Fund and the Bridge Repair and Replacement fund. The General Fund records the transactions related to policy making and strategic planning as it pertains to the Port's mission and values. The General Fund will also include general administration as well as a portion of support services. The Bridge Repair and Replacement fund is a Special Revenue Fund that is used to record capital improvements, planning, inspection and replacement activity associated with the Hood River/White Salmon Interstate Bridge, as well as any debt related activities with the existing bridge.

The Port adopts an annual budget for all its funds. Budgetary comparison schedules are provided to demonstrate compliance with applicable state budgetary rules. These schedules can be found in the Required Supplementary Information section of this report.

Business-type funds – Business type activities are used to distinguish operating revenues and expenses from non-operating items. The Port maintains an enterprise fund called the Revenue Fund which receives the following fees charged to Port customers:

- 1. Fees tolls paid by bridge users
- 2. Lease revenues industrial, commercial and mix-use tenants.
- 3. Rent for marina boat slips and airport hangers.
- 4. Fees for recreational events, parking and programs.

Notes to the financial statements provide additional information that is essential to fully understand the Port's financial statements and position.

Statement of Net Position

Net Position serves as a useful indicator of a government's financial position, especially when viewed over multiple periods of time. In the case of the Port, the total net position is \$44,444,011 at the close of this fiscal year. This represents a \$2,440,053 increase over the prior fiscal year.

Table 1 below depicts a decrease in total assets by \$99,386 which is primarily attributable to the retirement of debt from the tax-exempt bridge bonds and the taxable revenue bond from Lower Mills, while also considering the revenues and depreciation for the operations of the Port.

The largest portion of the Port's net position, at 82%, are invested in capital assets (e.g. bridge, land, buildings, and equipment) and reported net of accumulated depreciation less any outstanding related debt. The Port uses these capital assets to provide services to the public; thus, they do not represent resources available for future spending. Restricted Net position decreased to \$140,707 which represents cash and investments that are legally restricted for debt service related to the marina flex lease debt and a note payable. The 2013 general revenue (bridge) bonds of \$480,000 and the 2015 taxable general revenue bond of \$1,821,241 were extinguished during the year. Finally, the remaining \$7,822,320 is unrestricted, meaning it is available for meeting the Port's ongoing obligations.

Statement of Activities

As with the Statement of Net Position, the Port reports its financial activities within two activity types; Governmental, which includes the General Fund and the Bridge Repair and Replacement Fund, and Business-type activities, which include the Revenue Fund. As indicated in Table 2 below, total net position of the Port increased by \$2,440,053, or 6%, as compared to the prior year's balance.

Governmental Activities – The change in net position for governmental activities increased \$1,243,194, or 15%, from the prior year. This increase is primarily due to higher interfund transfers from the enterprise fund to the governmental funds for bridge planning and reimbursements from a State of Oregon grant, to fund the final environmental impact studies for a replacement bridge effort.

Financial highlights of governmental fund activities for the year include:

- Reimbursements amounting to \$1,473,192 from a legislative grant of \$5 million to complete the final environmental impact study concerning the replacement of the existing bridge.
- Higher interfund transfers by \$705,595
- Property taxes continue to increase in line with projections or about 4%.
- Higher investment earnings due to higher reserves.
- Personnel costs increased over \$131,048 to \$418,823 related to the additional staff time dedicated to the bridge replacement planning and legislative advocacy effort during the state legislative session.

Business-type Activities - Business type activities generated \$1,196,859, or a 4% increase in the Port's net position. The financial results for this year include an increase in toll revenues of \$954,538 or 19% over the prior year, which reflects an increase in toll rates that started February 2018. Bridge traffic showed a slight decrease to 4,345,711 crossings or 3% less crossings than the prior year. This was attributable to multiple bridge closures due to maintenance and capital improvements being made on the bridge. Lease revenues from industrial and commercial properties showed both, a restructuring of new leases and inflationary growth, which increased revenues by \$379,939 or 19%, over the prior year. Recreation related revenue increased by \$10,940 due to higher Event Site season pass prices. Capital grants continued to play an integral role to the Port as \$312,280 was received during the year, for the north apron development and environmental assessment at the airport.

Revenue Fund revenues decreased by \$126,014, which was primarily attributable to a decrease in capital grants from the Federal Aviation Administration for the south taxi-way project which was almost complete by June 2018. Although transfers increased by \$705,595 from the prior year, they were offset by increased toll revenues of \$954,538. Expenses remained relatively flat overall with a slight increase of \$104,011 over prior year expenses. Other miscellaneous expenses were the primary contributor, like credit card fees and technology costs as compared to prior years.

Financial Analysis and Outlook:

The Port is involved in a variety of activities that all contribute to the economic health and vitality of the community. The major source of funds for Port operations continues to be the toll bridge, accounting for 64% of Port operating revenues, excluding grants. Lease revenues and other fees continue to show significant improvement, with a combination of new restructured leases for renewals and fee increases for paid parking, marina slips, and hangar spaces at the airport. These assets continue to provide the Port with significant financial resources which enables diversification of the revenue mix. The Port has a 95% occupancy rate as the year ended and additional development opportunities may further expand the Port's leasable space. The Port purchased the property formerly known as the Lower Hanel Mill and is in the final process of developing the site for future industrial uses like warehousing and manufacturing. This will partially offset the leasable square footage lost from the sale of the Expo building.

The Port receives property taxes which are recorded in the General Fund, however these taxes only account for 1% of total revenues and are used to fund policy and planning costs. Capital grants continue to play a vital role in how the Port develops properties, including the airport upgrade to the north apron and the environmental issues. The Port receives an operating grant from the Oregon State Marine Board that assists in funding Marina operations. Over the years the Port has incorporated extensive public outreach and community involvement to guide the development of the waterfront and especially the approximately 12-acre property known locally as "Lot 1". Lot 1 is prime industrial property that represents the last remaining large, developable property on the waterfront. The Port will continue to work with the community in planning for the property and expects to finalize the conceptual design and layout, as well as target markets for sale or lease of the developed properties. This will help determine the proper sizing for utilities and other infrastructure that will need to be put in place. Ultimately, examination of these costs will assist in the determination of the appropriate kind and amount of public subsidy that will be needed in attaining the return on investment that is satisfactory to the Port Commission.

The following categories are helpful to describe the Port's separate business units:

Bridge – The bridge traffic decreased slightly for the year with 4,345,711 crossings, a 3.5% decrease as compared to the previous year. This decrease is attributable to a large number of bridge closures for maintenance and capital improvements throughout the year. This was the first full year that reflected the toll increase that started February 2018. Cash customers pay \$2 per crossing for passenger vehicles, versus \$1 per crossing in the previous year, while the Breezeby customer pays \$1 up from \$0.80 per prior to the toll increase. Trucks now pay \$3 per axle on a cash basis versus \$1 previously, while Breezeby trucks pay \$2 per axle as opposed to \$0.80 per axle previously. The toll increase generated revenues that will be used for the capital improvements of the existing bridge and the replacement bridge efforts. Current engineer estimates show capital improvement, maintenance, and inspection needs in excess of \$54 million of over the next 15-20 years for the existing bridge.

The Port received a \$5 million grant from the State of Oregon to complete the Final Environmental Impact Study required for bridge replacement. This effort will include outreach to all the affected communities so that when the funding phase of this effort occurs, barriers to completion and any other issues can be addressed to achieve broad support for the overall framework of the replacement effort.

This year saw continued capital improvements to the existing bridge's lift span, portal truss, steel repairs and the ongoing replacement of the tolling system. The 30-year plan for the bridge continues to be refined as the Port moves toward bridge replacement. This dual long-range strategy has determined that tolls must continue to be studied to allow the development of reserves as well as the long-term replacement of the existing bridge. During this year, the Port continued to upgrade and replace elements of the tolling system hardware and software amounting to \$251,949. Bridge operating expenses amounted to \$1,978,340, including \$306,708 in depreciation. Expenses were higher by \$181,310 primarily due to higher personnel costs, credit card fees and professional services for the year.

Leased Properties – This year, \$697,645 in capital improvements were made to the Jensen building and adjoining parking lot (\$34,968), the Lower Mill development (\$511,887), the DMV and the Marina office buildings (\$34,121), and the Wasco facility (\$19,942). These capital improvements were made to ensure continued demand for these facilities as well as to maintain the level of tenant occupancy and satisfaction necessary to fulfill job development and small business growth within the Port district. Lease revenues and other reimbursable fees (i.e., utilities and property taxes) were \$2,446,436, reflecting an increase of \$475,647 over the prior year. Developed property (i.e., Industrial and Commercial) expenses amounted to \$1,841,726 of which \$470,347 was depreciation. Expenses were \$7,659 more than the prior year, primarily due to higher utility costs.

Undeveloped Property – There continues to be various discussions on the remaining undeveloped lots at the waterfront. The Port continues to engage the local community as well as incorporate the remaining lots into it's Strategic Plan which will assist in defining the development options for the remaining parcels. Undeveloped property expenses amounted to \$207,811, an increase of \$98,244 from the prior year. The increase is due to professional services related to parking enforcement and the Lot 1 infrastructure plan.

Recreation – The Port continues to program and manage waterfront activities, which during peak periods of the summer has considerable traffic and use. The recreational usage along the waterfront continues to challenge the Port's ability to meet public user expectations. The growth in kiteboarding, windsurfing, and the addition of paddle boarding has waterfront users competing against each other for time, access to the water, and space. Last summer the Port increased seasonal and daily parking fees at the Event Site to assist in securing additional law enforcement activity in the area. This year recreation revenues amounted to \$217,110 which was an increase of \$10,940 over the prior year. Recreation expenses amounted to \$578,324 of which \$128,306 was depreciation. Expenses increased

by \$68,214 over the prior year, which was attributable to higher maintenance costs and staffing costs during the summer season.

Marina – The marina continues to have a wait list of more than 78 potential slip renters, seeking space in a Marina with a total of 165 slips. The marina has a history of 100% occupancy and this year is no exception. The Port has upgraded the electrical infrastructure on the docks and has significantly upgraded several docks adjoining the boathouse portion of the marina. Both projects were completed at the end of summer 2014, however during the current year numerous electrical outages occurred due to a faulty electrical feeder line off the electrical panel, which was replaced. These repairs allowed the Port to bring the electrical trip level down to 100 milliamps. The Port is sharing the cost of these capital improvements (i.e., electrical and docks) with the marina tenants through an assessment. The marina tenants are being assessed 80% of the costs related to these projects. For the year, marina revenues amounted to \$358,829 which is an increase of \$28,474 compared to the prior year. This increase is attributable to a 6% increase in moorage rates to tenants. The revenues included \$87,746 of assessments for the previous electrical improvements mentioned above. Marina expenses were \$332,663, of which \$79,870 was depreciation. Expenses were more by \$24,145 from the prior year, due to higher maintenance costs for the remaining electrical work.

Airport – As noted above, the airport master plan was finally approved by the Federal Aviation Administration ("FAA") during the year. The north apron development to the airport is funded by both a FAA grant and a state Connect VI grant. The north apron rehabilitation incurred \$61,275 of capital improvements, while the environmental assessment for the north apron incurred \$74,040. These two projects will be funded by a FAA grant which requires a 10% match by the Port. The airport technology and emergency center will be funded by a state grant that requires a 29% local match.

Airport hangar rates saw an increase of 6% for the year as the Port pursues a multi-year increase of airport hangar rates, to bring them in line with comparable airports. This will also allow for more cost recovery by the airport for its operations. Airport revenues were \$213,080 which is \$23,197 more than the prior year. Capital grants amounted to \$312,298 for environmental assessment, design and engineering for the north apron as well as funding for the commercial technology area. Expenses amounted to \$598,661 of which \$337,721 was depreciation. Expenses increased by \$89,361 from the prior year, which primarily was attributable to depreciation as the south taxiway was placed into service at the end of last year.

Economic Factors - The Port has a stable set of resources for ongoing operations and maintenance such as tolls and lease revenues. Since property taxes are such a small percentage of the revenue mix, a recession does not have the same impact to the Port's resources as it would otherwise have with other tax-dependent agencies. Additionally, the Hood River area continues to see a high demand for housing but also continues to have a limited supply of developable properties, thereby keeping the recessionary impact to property values from occurring at significant levels. Employment and job

growth continue at a moderate pace and the Port continues to focus strategic decisions on how best to stimulate job growth in the community and surrounding area.

Uncertainties about future economic changes and financial impacts are common throughout the region. To deal with the swings in the economy and to plan for future capital expansion, the Port has routinely set aside resources. The Port will update its Strategic Business Plan in the coming year and will integrate its key financial policies regarding reserves, debt coverage, and revenue diversification in the update.

Request for Information – The Port's financial statements are designed to present users (citizens, taxpayers, customers, investors, and creditors) with a general overview of the Port's finances and to demonstrate the Port's accountability. If you have questions about this report or need additional information, please contact the Port's Chief Financial Officer at 1000 E. Port Marina Drive, Hood River, OR 97031, or via email to fkowell@portofhoodriver.com.

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

For the Year Ended June 30, 2019

Net Change in Fund Balances - Total Government Funds		\$ 672,837
Amounts Reported for Governmental Activities in the Statement of Activities are are different because:		
Government Funds report Capital Outlays as Expenditures while Governmental Activities report Depreciation Expense to allocate those Expenditures over the life of the assets. This is the amount by which Depreciation exceeded Capital Outlays in the current period.		
Expenditures for Capital Assets	775,664	
Less: Current Year Depreciation	(673,830)	101,834
Under the modified accrual basis of accounting used in government funds, expenditures are not recognized for transactions that are not normally paid with expendable available financial resources. In the Statement of Activities, however, which is presented on the accrual basis of accounting, expenses and liabilities are reported regardless of when financial resources are available. This adjustment combines the net changes in liability balances.		
Long Term Debt Principal Paid	480,000	
Accrued Interest Expense	968	480,968
Deferred Charge on Refunding - Amortization		(7,000)
The pension expense represents the change in net pension asset (liability) from year to year due to changes in total pension liability and the fair value of the pension plan net position available to pay pension benefits.		(5,874)
The OPEB expense represents the net change in total OPEB liability for the year.		(314)
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds.		
Property taxes		743
Change in Net Position of Governmental Activities		\$ 1,243,194

Notes to Financial Statements June 30, 2019

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The financial statements of the Port of Hood River, Oregon, have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the accounting policies are described below.

Port of Hood River (Port) is a municipal corporation governed by an elected board of commissioners consisting of a president, vice-president, secretary, treasurer, and a fifth commissioner. As required by generally accepted accounting principles in the United States of America, all activities of the Port have been included in these financial statements.

Component units, as defined by the Governmental Accounting Standards Board (GASB) Statement No. 14, 39 and 61, are separate organizations which are included in the reporting entity because of the significance of their operational or financial relationships with the Port. There are no component units reported herein.

B. Government-wide and fund financial statements

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which primarily rely on bridge toll revenues and lease income.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment, are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. Amounts reported as *program revenues* include:

- 1) Charges to customers or applicants for goods, services, or privileges provided,
- 2) Operating grants and contributions, and
- 3) Capital grants and contributions, including special assessments.

Taxes and other items not properly included among program revenues are reported instead as *general* revenues.

C. Measurement Focus, Basis of Accounting and Basis of Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Port considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to claims and judgments, are recorded only when payment is due. Property taxes associated with the current fiscal period are recognized as revenues in the current fiscal period if collected within sixty days after year end.

D. Budgetary Basis of Accounting

While the financial position, results of operations, and changes in fund balance or net position is reported on the basis of accounting principles generally accepted in the United States of America (GAAP), the budgetary basis of accounting differs from generally accepted accounting principles. The budgetary statements provided as part of required supplementary information and supplementary information elsewhere in this report are presented on the budgetary basis to provide a meaningful comparison of actual results with the budget. The primary differences between the budgetary basis and GAAP are that capital outlay is expensed when purchased, depreciation and amortization expenses are not reported, property taxes are recognized as revenue when received instead of when levied, inventory is expended as purchased, and proceeds of long-term borrowing are recognized as an "other financing source" and principal paid is considered an expenditure when paid.

The Port reports the following major governmental funds:

The General Fund is the Port's primary administration fund. Financial transactions not specifically related to the Port's other funds are accounted for therein. The major revenue sources are property taxes, interest income and revenues transferred from the Port's enterprise fund.

The *Bridge Repair and Replacement Fund* is the Port's special revenue fund. This fund accounts for the revenues and expenditures related to the bridge capital improvements that are made to maintain, extend or replace its structures, surfaces, and integrity of its components into the future. It is financed by debt and transfers received from a portion of the bridge toll revenues and by interest income earned from within the fund.

The Port reports the following major enterprise fund:

The Revenue Fund is the Port's enterprise fund. This fund was established to account for the revenues and expenses of the Port's operating activities. The primary sources of revenue are the bridge tolls, lease rentals, fees, grant proceeds, and proceeds from the sale of any assets.

Proprietary funds distinguish operating revenues and expenses from non-operating items. The principal operating revenues of the enterprise fund are bridge tolls, lease rentals and fees, and operating grants. Operating expenses for the enterprise fund include administrative expenses, maintenance, insurance, and depreciation on capital assets. All other revenues and expenses are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the Port's policy to use restricted resources for their intended purposes first then unrestricted resources as they are needed. Within unrestricted resources, committed and assigned are considered spent (if available) for their intended purposes before unassigned amounts.

E. Cash and Investments

The cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

Fair Value Inputs and Methodologies and Hierarchy

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Observable inputs are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are developed based on the best information available about the assumptions market participants would use in pricing the asset. The classification of securities within the fair value hierarchy is based upon the activity level in the market for the security type and the inputs used to determine their fair value, as follows:

<u>Level 1</u> – unadjusted price quotations in active markets/exchanges for identical assets or liabilities that each Fund has the ability to access, or

<u>Level 2</u> – other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, loss severities, credit risks and default rates) or other market-corroborated inputs), or

<u>Level 3</u> – unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including each Fund's own assumptions used in determining the fair value of investments).

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgement exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

F. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the reporting period. Actual results could differ from those estimates.

G. Budgets

A budget is prepared for all funds, in accordance with the modified accrual basis of accounting and legal requirements set forth in the Oregon Local Budget Law. The budget process begins in each fiscal year with the establishment of the Budget Committee. Recommendations are developed through late winter with the Budget Committee approving the budget in early spring. Public notices of the budget hearing are published generally in early spring with a public hearing being held approximately three weeks later. The Board of Commissioners may amend the budget prior to adoption; however, budgeted expenditures for each fund may not be increased by more than ten percent. The budget is then adopted, appropriations are made and the tax levy declared no later than June 30th.

Expenditure budgets are appropriated at the following levels for each fund:

LEVEL OF CONTROL

Personnel Services
Materials and Services
Capital Outlay

Interfund Transfers
Debt Service
Operating Contingency

Appropriations lapse at the fiscal year-end. Management may amend line items in the budget without Commissioner approval as long as appropriation levels (the legal level of control) are not changed. Supplemental appropriations may occur if the Commissioners approve them due to a need which exists which was not determined at the time the budget was adopted.

Expenditures of the various funds were within authorized appropriations for the year ended June 30, 2019.

H. Assets, deferred outflows of resources, liabilities, deferred inflows of resources and net position or equity

1. Deposits and investments – restricted and unrestricted

The Port's cash and cash equivalents are considered to be cash on hand, checking deposits, short-term investments with original maturities of three months or less from the date of acquisition and investments in securities with existing maturities of eight years or less. Investments are recorded at fair value when a market price is available. Assets whose use is restricted to specific purposes by state law or bond indenture are segregated on statement of net position.

2. Receivables and payables

Property tax receivables are deemed to be substantially collectable or recoverable through foreclosure. Accordingly, no allowance for doubtful accounts is deemed necessary with regard to property taxes. All other receivables are shown net of an allowance for uncollectable.

Property taxes are levied and become a lien as of July 1. Property taxes are assessed in October and tax payments are due November 15th. Under the partial payment schedule, the first one-third of taxes are due November 15th, the second one-third on February 15th, and the remaining one-third on May 15th. A three percent discount is allowed if full payment is made by November 15th, and a two percent discount is allowed if two-thirds payment is made by November 15th. Taxes become delinquent if not paid by the due date and interest accrues after each trimester at a rate of one percent per month. Property foreclosure proceedings are initiated four years after the tax due date.

Accounts receivables accordingly, do have an allowance for doubtful accounts that is monitored based upon the payment trends of accounts and their business's ability to pay. If an account depicts financial stress, an agreement is normally renegotiated to keep a past due balance from becoming uncollectible.

3. Inventories

The Port's inventory at year end is stated at cost, using the first in first out method.

4. Prepaid Expenses

Certain payments to vendors reflect costs applicable to a future accounting period(s) and are recorded as prepaid items in both government-wide and fund financial statements.

5. Capital Assets

In accordance with GASB Statement No. 34, the Port has reported all capital assets, which include property, equipment and infrastructure assets (e.g., roads, bridges), in the applicable governmental columns in the government-wide financial statements. Capital assets are defined by the Port as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of two years. The useful lives generally range from 5 to 40 years for land and building improvements, 20 to 60 years for bridge and related improvements, and 5 to 15 years for equipment. Such assets are recorded at historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair value at the date of donation. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Major outlays for land, buildings, and improvements are capitalized as projects are purchased or constructed. Property, plant and equipment of the Port are depreciated using the straight-line method over the estimated useful life of the asset.

6. Compensated Absences

It is the Port's policy to permit employees to accumulate earned but unused vacation leave, which will be paid to employees upon separation from service. All vacation pay is accrued when incurred in the government-wide financial statements and in the proprietary fund financial statements. The Port allows for a maximum of 240 hours of vacation to be carried forward at the end of a calendar year.

7. Non-current liabilities

In the government-wide financial statements long-term debt, and notes payable are reported as long-term liabilities in the Port's statement of net position.

In the fund financial statements, governmental fund types recognize bond premiums, or discounts at the time of bond issuance and are either reported as other financing sources or uses. The face amount of debt issued is reported as other financing sources.

Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

8. Net position & fund balance

The government-wide statement of net position reports \$140,707 of restricted net position which is restricted for the Port's future bond debt service. In the fund financial statements, fund balance is reported in a classification that is comprised of a hierarchy based on the extent to which the Port is bound to honor constraints on the specific purpose for which amounts in those funds can be spent. The classifications of fund balances are Nonspendable, Restricted, Committed, Assigned and Unassigned. Nonspendable and Restricted fund balances represent the restricted classifications and Committed, Assigned, and Unassigned represent the unrestricted classifications.

Nonspendable fund balance includes amounts that cannot be spent because either 1) it is not in a spendable form, such as inventory or prepaid items or 2) legally or contractually required to be maintained intact.

Restricted fund balance has externally enforceable limitations imposed by creditors, grantors, contributors, laws and regulations of other governments, or laws through constitutional provisions or enabling legislation.

Committed fund balance is self-imposed limitations at the highest level of decision making authority (Board of Commissioners). The Board of Commissioners approval is required to commit resources or to rescind the commitment. This is done by vote and/or passing a resolution.

Assigned fund balance represents limitations imposed by management and/or Board of Commissioners that do not meet the criteria to be classified as restricted or committed. Assigned fund balance requests are submitted to the Executive Director and/or the Board of Commissioners for approval.

Unassigned fund balance represents the residual net resources in excess of the other classifications. The general fund is the only fund that can report a positive unassigned fund balance and any governmental fund can report a negative unassigned fund balance.

It is the policy of the Port that resources are to be expended in the following order: Restricted, Committed, Assigned, and Unassigned.

9. Deferred outflows/inflows of resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until then. The government has two items that qualify for reporting in this category. These include the deferrals related to the PERS pension plan and the Port's OPEB on the Statement of Net Position.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government has only one type of item which arises only under the modified accrual basis of accounting, which qualifies for reporting in this category. Accordingly, the item, unavailable revenue, is only reported in the governmental funds balance sheet. The governmental funds report unavailable revenue from one source: property taxes. This amount is deferred and recognized as an inflow of resources in the period that the amount becomes available. The Port also has two items which arise under full accrual accounting in the Statement of Net Position, which are the deferrals related to the PERS pension plan and the Port's OPEB.

10. Retirement Plans

Substantially all of the Port's employees are participants in the State of Oregon Public Employees Retirement System (PERS). For the purpose of measuring the net position liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about fiduciary net position of PERS and additions to, deductions from PERS's fiduciary net position have been determined on the same basis as they are reported by PERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms. Investments are reported at fair value. GASB Statements 68 and 71 have been implemented as of July 1, 2014.

NOTE 2 – DETAILED NOTES ON ALL FUNDS

A. Cash and investments

Deposits with financial institutions

The Port's deposits are held in a qualified bank depository meeting the requirements specified by the Oregon State Treasurer's office, as well as the Port's investment policy.

Being a qualified bank depository provides an additional level of collateral to mitigate the level of custodial risk that may be present when deposits exceed the \$250,000 level of insured funds by the Federal Depository Insurance Corporation (FDIC). The level of custodial risk relates to the level of insurance a financial institution will provide if financial difficulties were to occur that would affect Port deposits. The amount of collateral a financial institution will pledge as security for the deposits and the level of creditworthiness of the financial institution.

The bank balance as of June 30, 2019 maintained by the Port was \$806,767. At various times during the fiscal year, bank balances exceeded the FDIC limit but any funds in excess of the FDIC insured limit were covered by collateral pledged by qualified depositories. These depositories are qualified by the Oregon State Treasurer's office.

	 Balance					
	Book	Bank				
Checking Accounts - General	\$ 789,970	\$	805,680			
Checking Accounts - Payroll	 995		1,087			
Total Checking Deposits	\$ 790,965	\$	806,767			

Investments

Investments in the Local Government Investment Pool (LGIP) are included in the Oregon Short-Term Fund, which is an external investment pool that is not a 2a-7 like external investment pool, and is not registered with the U. S. Securities and Exchange Commission as an investment company. Fair value of the LGIP is calculated at the same value as the number of pool shares owned. The unit of account is each share held, and the value of the position would be the fair value of the pool's share price multiplied by the number of shares held. Investments in the Short-Term Fund are governed by ORS 294.135, Oregon Investment Council, and portfolio guidelines issued by the Oregon Short-Term Fund Board, which establish diversification percentages and specify the types and maturities of investments. The portfolio guidelines permit securities lending transactions as well as investments in repurchase agreements and reverse repurchase agreements. The fund's compliance with all portfolio guidelines can be found in their annual report when issued.

The LGIP seeks to exchange shares at \$1.00 per share; an investment in the LGIP is neither insured nor guaranteed by the FDIC or any other government agency. Although the LGIP seeks to maintain the value of share investments at \$1.00 per share, it is possible to lose money by investing in the pool. We intend to measure these investments at book value since it approximates fair value. The pool is comprised of a variety of investments. These investments are characterized as a level 2 fair value measurement in the Oregon Short Term Fund's audited financial report. Amounts in the State treasurer's Local Government Investment Pool are not required to be collateralized. The audited financial reports of the Oregon Short Term Fund can be found here:

http://www.oregon.gov/treasury/Divisions/Investment/Pages/Oregon-Short-Term-Fund-(OSTF).aspx. If the link has expired please contact the Oregon Short Term Fund directly.

At June 30, 2019, the Port held most of its investments in the LGIP having a carrying amount of \$5,650,044 which approximates fair value. The Port held other agency, banking and energy investments worth \$2,181,126.

Current investment ratings and weighted average maturities depicted as follows:

Investment Type	Credit Quality	Type of Issuer	Fair Value Activity Level	Fair Value	Weighted Avg to Maturity in Years

		100%		\$ 7,831,170	

As of June 30, 2019 the Port held the following cash and investments:

				Special				
	General Revenue			E	nterprise	Total		
		Fund	Fund		Fund		Fair Value	
Cash on Hand	\$	-	\$	-	\$	1,875	\$	1,875
Checking Deposits		-		-		790,965		790,965
Cash with Fiscal Agents		403				1		404
Local Government Investment Pool		291,850		1,877,476		3,480,718		5,650,044
Investments (at fair value)		-				2,181,126		2,181,126
Total Cash & Investments	\$	292,253	\$	1,877,476	\$	6,454,685	\$	8,624,414

The cash and investments are reflected in the financial statements as follows:

Cash & Investments Cash & Investments - restricted	\$ 292,253	\$ 1,877,476	\$ 6,313,978 140,707	\$ 8,483,707 140,707
Total Cash & Investments	\$ 292,253	\$ 1,877,476	\$ 6,454,685	\$ 8,624,414

Fair value of financial assets and liabilities:
The Port estimates the fair value of its monetary assets and liabilities based upon the existing interest

rates related to such assets and liabilities compared to the current market rates of interest for instruments of a similar nature and degree of risk. The Port estimates that all of its monetary assets and liabilities approximate fair value as of June 30, 2019.

Custodial credit risk

Custodial credit risk is the risk that in the event of failure of the bank and/or counterparty, the Port will not be able to recover the value of its deposit and investments or collateral securities in possession of an outside party.

Credit risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligation. The State Treasurer's investment pool account is unrated as to credit risk.

Interest rate risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

Concentration of credit risk

Concentration of credit risk is the risk of a loss attributed to the magnitude of a government's investment in a single issuer. The Port has a formal policy that places a limit on the amount that it may invest in any one issuer and mitigates the other types of investment risk through analysis of the securities it will purchase that will align with its Investment policy both in maturity, investment quality, capital needs and safekeeping. The LGIP investment represents 72% of the Port's total investments.

B. Receivables

Accounts receivables consist of amounts due for grants, leases, rents, taxes and other fees. The balances for governmental and business-type activities on June 30, 2019 are as follows:

	Type of Activities								
	Governmental			Business		Total			
Accounts Receivables - Trade	\$	-	\$	486,789	\$	486,789			
Grants Receivables		-		809,964		809,964			
Taxes Receivable		4,390		-		4,390			
Less: Allowance for doubtful accounts		-		(32,341)		(32,341)			
Net Accounts Receivable	\$	4,390	\$	1,264,412	\$	1,268,802			

Notes receivable due to the Port at June 30, 2019 are summarized below:

Pfriem Brewery – The mission of the Port of Hood River has many attributes, but primarily it is to stimulate job growth in the community. As a landlord of industrial property, the Port markets itself to tenants such as Pfriem Brewing Company (Pfriem). Pfriem was a startup brewer in need of light industrial space to brew a premium beer that would promote jobs in the community. The original note receivable negotiated with Pfriem was \$50,976 but was later adjusted to \$47,765. This was due

to the delay in construction consequently allowing occupancy. The note receivable is at a 4% rate of interest with a monthly payment of \$496 for a 10 year period with 3 years and 7 months remaining.

In November 2013, a second note receivable of \$106,855 was approved for a 10 year payback at a 5% rate of interest. This note receivable was for a capital expansion of the current facility they are using. Both notes were consolidated on February 1, 2015 into one payment stream with the original amortization schedule and terms. The balance on the note receivable with Pfriem at June 30, 2018 was \$88,478 and was paid off October 2018.

	Note	s Receivable

Total Cost, net	\$ 8,940,897	\$	7,493,765	\$	9,798,637	\$	26,233,299

Minimum future rentals receivable on non-cancelable operating leases for the five succeeding fiscal years and thereafter are as follows:

	\mathbf{N}	l inimum					
Year Ended June 30,	Fut	Future Rentals					
2020	\$	1,603,603					
2021		1,555,086					
2022		1,439,180					
2023		1,346,867					
2024		1,274,954					
Total	\$	7,219,690					

D. Interfund receivables, payables, and transfers

The composition of interfund transfers to the General and Bridge Repair and Replacement fund to cover their fund expenses at June 30, 2019, are as follows:

	Transfers				
		In		Out	
General fund	\$	545,471	\$	-	
Bridge repair and replacement fund		1,953,201		-	
Revenue fund			-	2,498,672	
Total	\$	2,498,672	\$	2,498,672	

E. Debt

In the following table, debt information is presented with respect to governmental and business-type activities. The table below presents current year changes in those obligations and the current portions due for each issue. Each debt issue is defined below as well as their annual debt service requirements to maturity. The long-term debt activity for the year ended June 30, 2019 is as follows:

Governmental Activities	eginning Balance	Ado	ditions Reductions			Ending Balance		ue Within One Year

Total	\$ 4,928,889	\$	-	\$	2,415,928	\$	2,512,961	\$	1,942,961

General Revenue Bonds – Governmental Activities

The Port issued general revenue bonds to provide funds for improvements to the Port's toll bridge, which included the bridge redecking, upgrading the Bridge's toll plaza and other improvements. The original amount of the general revenue bonds issued in August, 2003 was \$8,000,000. In addition to the bond proceeds, the Port has contributed existing funds from reserves for capital improvements to the bridge. In October 2013, the Port issued a General Revenue Refunding Bond, Series 2013 in the amount of \$3,730,000 which refunded the 2003 General Revenue bonds. The Port's toll revenues are expected to provide sufficient funds to pay the debt service on the 2013 General Revenue Refunding bonds.

General revenue bonds are direct obligations and pledge the gross revenues from Port facilities, including earnings on amounts on gross revenues, less any grants, sale of assets, and ad valorem taxes of the Port. The refunding bonds were issued over the remaining 5 years of the original 15-year serial bond life. The interest rates on the bonds were fixed at 2.38%. The bonds were paid off December 2019.

The interest expense on the statement of activities for the general revenue bonds for the fiscal year ended June 30, 2019 is \$4,808, with additional amortization of interest costs to total \$11,808.

Flexlease Payable — Business-Type Activity

The Port has entered into two financing agreements with the Special Districts Association of Oregon Flexlease Program to finance the expansion of the Port's marina and to upgrade its electrical infrastructure with associated dock improvements. The Flexlease program issued Certificates of Participation Series 2010E and 2013B, totaling \$290,000 and \$770,000, respectively. The interest rates for the 2010E and 2013B series are fixed for each series and range from 1.5% to 4.4% and 2.0% to 3.90%, respectively. Revenues as well as special assessments from the expanded and improved marina are expected to fund the debt service for each series. Upon the event of default, the Trustee shall not have the right to declare the unpaid principal components of the installment payments due and payable, but can initiate whatever action necessary under the law. Events of Default - failure to pay installment payments or make false statements in the official statement, and not comply with disclosure requirements. There are no acceleration clauses. Annual debt service requirements to maturity of the 2010E Flexlease payable is as follows:

						Total
Year Ending June 30,	Principal		Interest		Del	bt Service
2020	\$	20,000	\$	5,670	\$	25,670
2021		20,000		4,840		24,840
2022		25,000		3,850		28,850
2023		25,000		2,750		27,750
2024		25,000		1,650		26,650
2025		25,000		550		25,550
Total	\$	140,000	\$	19,310	\$	159,310

Interest expense during the current fiscal year on the 2010E series Flexlease Loan is \$6,435.

Annual debt service requirements for the 2013B Flexlease loan is as follows:

Flexlease Series 2013B - Business-Type Activities

					J 1	Total
Year Ending June 30,	P	Principal		Interest		bt Service
2020	<u> </u>	45,000	\$	20,206	\$	65,206
2021		50,000		18,588		68,588
2022		50,000		16,725		66,725
2023		50,000		14,625		64,625
2024		55,000		12,263		67,263
2025-2028		245,000		22,837		267,837
	\$	495,000	\$	105,244	\$	600,244

Interest expense during the current fiscal year on the 2013B series Flexlease Loan is \$21,624.

Note Payable — Business-Type Activity

The Port has an installment note payable with LJS Manufacturing, Inc. for the purchase of a commercial building at the Port's waterfront industrial park. The note is secured by the commercial building. The original amount of the note was \$2,250,000 and interest is fixed at 5%. Monthly payments of \$12,079 are due until May 21, 2020, when the entire unpaid balance is due. If the installment payment is not completed by the 14th day from the due date the holder of the note may request the acceleration of the remaining balance. It's a note payable with no remedies other than accelerating the outstanding balance and any legal fees paid by borrower. The annual debt service requirement through to maturity with regard to the note payable is as follows:

Beginning							Ending		ue Within	
Business-Type Activities]	Balance	Add	litions	Reductions		Balance One		One Year	
Note Payable	\$	1,927,648	\$	-	\$	49,687	\$	1,877,961	\$	1,877,961

Interest expense during the current fiscal year on the LJS note payable is \$95,255

	Note Payable - Business-Type Activities							
					Total			
Year Ending June 30,	P	I1	nterest	Debt Service				
2020	\$	1,877,961	\$	85,087	\$	1,963,047		
Total	\$	1,877,961	\$	85,087	\$	1,963,047		

<u>Taxable General Revenue Bond – Business-Type Activity</u>

The Port acquired property at the Hanel Lower Mills site which is a light industrial property. The Port intends to develop this site over the next few years. In acquiring the property, the Port received a grant from the Department of Environmental Quality to clean up the site for future development. The bond is secured by the net operating revenues of the Port. The original bond amount is \$2,000,000 with an interest rate at 3.51%. Semi-annual payments of \$70,354 are due April 15th and October 15th until October 15, 2018, when the final payment of \$1,853,735 was made. Interest expense during the current fiscal year on the taxable bond payable is \$18,992.

NOTE 3 – OTHER INFORMATION

A. Oregon Public Employees Retirement System (PERS)

<u>Plan Description</u> – The Oregon Public Employees Retirement System (PERS) consists of a single cost-sharing multiple-employer defined benefit plan. All benefits of the system are established by the legislature pursuant to Oregon Revised Statute (ORS) Chapters 238 and 238A. Oregon PERS produces an independently audited Comprehensive Annual Financial Report which can be found at: http://www.oregon.gov/PERS/Documents/Financial/CAFR/2018-CAFR.pdf.

- a) **PERS Pension (Chapter 238).** The ORS Chapter 238 Defined Benefit Plan is closed to new members hired on or after August 29, 2003.
 - i) Pension Benefits. The PERS retirement allowance is payable monthly for life. It may be selected from 13 retirement benefit options. These options include survivorship benefits and lump-sum refunds. The basic benefit is based on years of service and final average salary. A

percentage (2.0 percent for police and fire employees, and 1.67 percent for general service employees) is multiplied by the number of years of service and the final average salary. Benefits may also be calculated either by a formula plus annuity (for members who were contributing before August 21, 1981) or a money match computation if a greater benefits results. A member is considered vested and will be eligible at minimum retirement age for a service retirement allowance if he or she has had a contribution in each of five calendar years or has reached at least 50 years of age before ceasing employment with a participating employer (age 45 for police and fire members). General service employees may retire after reaching age 55. Police and fire members are eligible after reaching age 50. Tier 1 general service employee benefits are reduced if retirement occurs prior to age 58 with fewer than 30 years of service. Police and fire member benefits are reduced if retirement occurs prior to age 55 with fewer than 25 years of service. Tier 2 members are eligible for full benefits at age 60. The ORS Chapter 238 Defined Benefit Pension Plan is closed to new members hired on or after August 29, 2003.

- ii) Death Benefits. Upon the death of a non-retired member, the beneficiary receives a lump-sum refund of the member's account balance (accumulated contributions and interest). In addition, the beneficiary will receive a lump-sum payment from employer funds equal to the account balance, provided on or more of the following contributions are met:
 - member was employed by PERS employer at the time of death,
 - member died within 120 days after termination of PERS covered employment,
 - member died as a result of injury sustained while employed in a PERS-covered job, or
 - member was on an official leave of absence from a PERS-covered job at the time of death.
- iii) Disability Benefits. A member with 10 or more years of creditable service who becomes disabled from other than duty-connected causes may receive a non-duty disability benefit. A disability resulting from a job-incurred injury or illness qualifies a member (including PERS judge members) for disability benefits regardless of the length of PERS-covered service. Upon qualifying for either a non-duty or duty disability, service time is computed to age 58 (55 for police and fire members) when determining the monthly benefit.
- iv) Benefit Changes after Retirement. Members may choose to continue participation in a variable equities investment account after retiring and may experience annual benefit fluctuations due to changes in the market value equity investments. Under ORS 238.360 monthly benefits are adjusted annually through cost-of-living changes. The cap on the COLA will vary based on the amount of the annual benefit.
- b) **OPSRP Pension Program (OPSRP DB).** The ORS Chapter 238A Defined Benefit Pension Program provides benefits to members hired on or after August 29, 2003.
 - i) Pension Benefits. This portion of OPSRP provides a life pension funded by employer contributions. Benefits are calculated with the following formula for members who attain normal retirement age:
 - Police and fire: 1.8 percent is multiplied by the number of years of service and the final average salary. Normal retirement age for police and fire members is age 60 or age 53 with 25 years of retirement credit. To be classified as a police and fire member, the individual must have been employed continuously as a police and fire member for at least five years immediately preceding retirement.

General Service: 1.5 percent is multiplied by the number of years of service and the final average salary. Normal retirement age for general service members is age 65, or age 58 with 30 years of retirement credit.

A member of the pension program becomes vested on the earliest of the following dates: the date the member completes 600 hours of service in each of five calendar years, the date the member reaches normal retirement age, and, if the pension program is terminated, the date on which termination becomes effective.

- ii) Death Benefits. Upon the death of a non-retired member, the spouse or other person who is constitutionally required to be treated in the same manner as the spouse, receives for life 50 percent of the pension that would otherwise have been paid to the deceased member.
- iii) Disability Benefits. A member who has accrued 10 or more years of retirement credits before the member becomes disabled or a member who becomes disabled due to job-related injury shall receive a disability benefit of 45 percent of the member's salary determined as of the last full month of employment before the disability occurred.
- iv) Benefit Changes after Retirement. Under ORS 238A.210 monthly benefits are adjusted annually through cost-of-living changes. The cap on the COLA will vary based on the amount of the annual benefit.

Contributions – PERS funding policy provides for monthly employer contributions at actuarially determined rates. These contributions, expressed as a percentage of covered payroll, are intended to accumulate sufficient assets to pay benefits when due. The funding policy applies to the PERS Defined Benefit Plan and the Other Postemployment Benefit Plans. Employer contribution rates during the period were based on the December 31, 2015 actuarial valuation, which became effective July 1, 2017. The state of Oregon and certain schools, community colleges, and political subdivision have made unfunded actuarial liability payments and their rates have been reduced. Employer contributions for the year ended June 30, 2019 were approximately \$212,174, excluding amounts to fund employer specific liabilities. In addition, approximately \$99,277 in employee contributions were paid by Port employees in fiscal 2019.

At June 30, 2019, the Port reported a liability of \$1,187,708 for its proportionate share of the net pension liability. The pension liability was measured as of June 30, 2018, and the total pension liability used to calculate the net pension liability, was determined by an actuarial valuation dated December 31, 2016. The Port's proportion of the net pension liability was based on a projection of the Port's long-term share of contributions to the pension plan relative to the projected contributions of all participating employers, actuarially determined. As of the measurement date of June 30, 2018, the Port's proportion was .0078 percent. Pension expense for the year ended June 30, 2019 was \$43,118.

The rates in effect for the year ended June 30, 2019 were:

- (1) Tier 1/Tier 2 16.39%
- (2) OPSRP general services 11.47%

	Deferred Outflow		Defer	red Inflow
	of Resources		of R	Resources
Differences between expected and actual experience	\$	40,402	\$	-
Changes of assumptions		276,140		-
Net difference between projected and actual earnings on investments		-		52,741
Changes in proportionate share		19,969		30,056
Differences between employer contributions and employer's				
proportionate share of system contributions		106,681		2,417
Total (prior to post-MD contributions)		443,192		85,214
Contributions subsequent to the MD		212,174		
Total	\$	655,366	\$	85,214

The amount of contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the fiscal year June 30, 2020.

Amounts reported as deferred outflows or inflow of resources related to pension will be recognized in pension expense as follows:

Year Ending June 30,	Amount		
2020	\$	172,340	
2021		130,775	
2022		11,847	
2023		32,756	
2024		10,260	
Thereafter		_	
Total	\$	357,978	

All assumptions, methods and plan provisions used in these calculations are described in the Oregon PERS system-wide GASB 68 reporting summary dated March 4, 2019. Oregon PERS produces an independently audited CAFR which can be found at:

http://www.oregon.gov/PERS/Documents/Financial/CAFR/2018-CAFR.pdf

Actuarial Valuations – The employer contribution rates effective July 1, 2017 through June 30, 2019, were set using the entry age normal actuarial cost method. For the Tier One/Tier Two component of the PERS Defined Benefit Plan, this method produced an employer contribution rate consisting of (1) an amount for normal cost (estimated amount necessary to finance benefits earned by employees during the current service year), (2) an amount for the amortization unfunded actuarial accrued liabilities, which are being amortized over a fixed period with new unfunded actuarial liabilities being amortized over 20 years.

For the OPSRP Pension Program component of the PERS Defined Benefit Plan, this method produced an employer rate consisting of (a) an amount for normal cost (the estimated amount necessary to finance benefits earned by the employees during the current service year), (b) an actuarially determined amount for funding a disability benefit component, and (c) an amount for the amortization of unfunded actuarial accrued liabilities, which are being amortized over a fixed period with new unfunded actuarial accrued liabilities being amortized over 16 years.

Actuarial Methods and Assumptions:

Valuation date	December 31, 2016 rolled forward to June 30, 2018 measurement date
Experience Study Report	2016, Published July 26, 2017
Actuarial cost method	Entry Age Normal
Amortization method	Amortized as a level percentage of payroll as layered amortization bases over a closed period; Tier One/Tier Two UAL is amortized over 20 years and OPSRP pension UAL is amortized over 16 years
Asset valuation method	Market value of assets
Inflation rate	2.5 percent
Investment rate of return	7.2 percent
Projected salary increase	3.5 percent overall payroll growth
Cost of Living Adjustment	Blend of 2.0 percent COLA and graded COLA (1.25/0.15 percent) in accordance with <i>Moro</i> decision, blend based on service
Mortality	Healthy retirees and beneficiaries: RP-2014 Health annuitant, sex-distinct, generational with Unisex, Social Security Data Scale, with collar adjustments and set-backs as described in the valuation. Active members: RP-2014 Employees, sex-distinct, generational with Unisex, Social Security Data Scale, with collar adjustments and set-backs as described in the valuation. Disabled retirees: RP-2014 Disabled retirees, sex-distinct, generational with Unisex, Social Security Data Scale.

Actuarial valuations of an ongoing plan involve estimates of value of reported amounts and assumptions about the probability of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Experience studies are performed as of December 31 of even numbered years. The method and assumptions shown are based on the 2016 Experience Study which is reviewed for the four-year period ending December 31, 2016.

Discount Rate – The discount rate used to measure the total pension liability was 7.2 percent for the Defined Benefit Pension Plan. The projection of cash flows used to determine the discount rate assumed that contributions from the plan members and those of the contributing employers are made at the contractually required rates, as actuarially determined. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments for the Defined Benefit Pension Plan was applied to all periods of projected benefit payments to determine the total pension liability.

Assumed Asset Allocation:

Asset Class/Strategy	Low Range	High Range	OIC Target
Cash	0.0%	3.0%	0.0%
Debt Securities	15.0%	25.0%	20.0%
Public Equity	32.5%	42.5%	37.5%
Private Equity	13.5%	21.5%	17.5%
Real Estate	9.5%	15.5%	12.5%
Alternative Equity	0.0%	12.5%	12.5%
Opportunity Portfolio	0.0%	3.0%	0.0%
Total			100.0%

Source: June 30, 2018 PERS CAFR; p. 98)

Long-Term Expected Rate of Return:

To develop an analytical basis for the selection of the long-term expected rate of return assumption, in July 2015, revised June 7, 2017 the PERS Board reviewed long-term assumptions developed by both Milliman's capital market assumptions team and the Oregon Investment Council's (OIC) investment advisors. The table below shows Milliman's assumptions for each of the asset classes in which the plan was invested at that time based on the OIC long-term target asset allocation. The OIC's description of each asset class was used to map the target allocation to the asset classes shown below. Each asset class assumption is based on a consistent set of underlying assumptions, and includes adjustment for the inflation assumption. These assumptions are not based on historical returns, but instead are based on a forward-looking capital market economic model.

		Compound Annual
		Return
Asset Class	Target	(Geometric)
Core Fixed Income	8.00%	3.49%
Short-Term Bonds	8.00%	3.38%
Intermediate-Term Bonds	3.00%	5.09%
High Yield Bonds	1.00%	6.45%
Large Cap US Equities	15.75%	6.30%

Commodities	1.88%	3.84%
Assumed Inflation- Mean		2.50%

Source: June 30, 2018 PERS CAFR; p. 72)

Sensitivity of the Port's proportionate share of the net pension liability to changes in the discount rate – The following presents the Port's proportionate share of the net pension liability calculated using the discount rate of 7.2 percent, as well as what the Port's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.2 percent) or 1-perentage-point higher (8.2 percent) than the current rate.

	Decrease (6.2%)		Rate (7.2%)		Increase (8.2%)
Port's proportionate share of					
the net pension liability	\$	1,984,885	\$ 1,187,708	\$	529,704

Changes Subsequent to the Measurement Date

As described above, GASB 67 and GASB 68 require the Total Pension Liability to be determined based on the benefit terms in effect at the Measurement Date. Any changes to benefit terms that occurs after that date are reflected in amounts reported for the subsequent Measurement Date. However, Paragraph 80f of GASB 68 requires employers to briefly describe any changes between the Measurement Date and the employer's reporting date that are expected to have a significant effect on the employer's share of the collective Net Pension Liability, along with an estimate of the resulting

change, if available. There are no changes subsequent to the June 30, 2018 Measurement Date that meet this requirement and thus would require a brief description under the GASB standard.

OPSRP Individual Account Program (OPSRP IAP)

Plan Description – Employees of the Port are provided with pensions through OPERS. All the benefits of OPERS are established by the Oregon legislature pursuant to Oregon Revised Statute (ORS) Chapters 238 and 238A. Chapter 238 Defined Benefit Pension Plan is closed to new members hired on or after August 29, 2003. Chapter 238A crested the Oregon Public Service Retirement Plan (OPSRP), which consists of the Defined Benefit Pension Program and the Individual Account Program (IAP). Membership includes public employees hired on or after August 29, 2003. PERS members retain their existing defined benefit plan accounts, but member contributions are deposited into the member's IAP account. OPSRP is part of OPERS, and is administered by the OPERS Board.

Pension Benefits – Participants ins OPERS defined benefit pension plans also participate in their defined contribution plan. An IAP member becomes vested on the date the employee account is established or on the date the rollover account was established. If the employer makes optional employer contributions for a member, the member becomes vested on the earliest of the following dates: the date the member completes 600 hours of service in each of the five calendar years, the date the member reaches normal retirement age, the date the IAP is terminated, the date the active member becomes disabled, or the date the active member dies. Upon retirement, a member of the OPSRP IAP may receive the amounts in his or her employee account, rollever account and vested employer account as a lump-sum payment or in equal installments over a 5, 10, 15, or 20 year period or an anticipated life span option. Each distribution option has a \$200 minimum distribution limit.

Death Benefits – Upon the death of a non-retired member, the beneficiary receives in a lump sum the member's account balance, rollover account balance, and vested employer optional contribution account balance. If a retired member dies before the installment payments are completed, the beneficiary may receive the remaining installment payments or choose a lump-sum payment.

Contributions – Employees of the Port pay six (6) percent of their covered payroll. The Port did not make any optional contributions to member IAP accounts for the year ended June 30, 2019.

Retirement Health Insurance Account

Plan Description – As a member of the Oregon Public Employees Retirement System (OPERS) the Port contributes to the Retirement Health Insurance Account (RHIA) for each of its eligible employees. RHIA is a cost-sharing multiple-employer defined benefit other postemployment benefit plan administered by OPERS. RHIA pays a monthly contribution toward the cost of Medicare companion health insurance premiums of eligible retirees. Oregon Revised Statute (ORS) 238.420 established this trust fund. Authority to establish and amend the benefit provisions of RHIA reside with the Oregon Legislature. The Plan is closed to new entrants after January 1, 2004. OPERS issues

a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to Oregon Public Employees Retirement System, PO Box 23700, Tigard, OR 97281-3700.

Funding Policy – Because RHIA was created by enabling legislation (ORS 238.420), contribution requirements of the plan members and the participating employers were established and may be amended only by the Oregon Legislature. ORS require that an amount equal to \$60 dollars or the total monthly cost of Medicare companion health insurance premium coverage, whichever is less, shall be paid from the Retirement Health Insurance Account established b the employer, and any monthly cost in excess of \$60 dollars shall be paid by the eligible retired member in the manner provided in ORS 238.410. To be eligible to receive this monthly payment toward the premium cost the member must: (1) have eight years or more of qualifying service in OPERS at the time of retirement or receive a disability allowance as if the member had eight years or more of creditable service in OPERS, (2) receive both Medicare Parts A and B coverage, and (3) enroll in an OPERS-sponsored health plan. A surviving spouse or dependent of a deceased OPERS retiree who was eligible to receive the subsidy is eligible to receive the subsidy if he or she (1) is receiving a retirement benefit or allowance form OPERS or (2) was insured at the time the member died and the member retired before May 1, 1991.

Participating employers are contractually required to contribute to RHIA at a rate assessed each year by OPERS, and the Port currently contributes 0.50% of annual covered OPERF payroll and 0.43% of OPSRP payroll under a contractual requirement in effect until June 30, 2019. The OPERS Board of Trustees sets the employer contribution rates based on the annual required contribution of the employers (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) of the plan over a period not to exceed thirty years. The Port's contributions to RHIA for the years ended June 30, 2017, 2018 and 2019 are \$6,173, \$6,001, and \$7,548, respectively, which equaled the required contributions each year.

At June 30, 2019, the Port's net OPEB liability/(asset) and deferred inflows and outflows were not considered significant by management and were not accrued on the government wide statements.

Additional disclosures related to Oregon PERS not applicable to specific employers are available online, or by contacting PERS at the following address: PO Box 23700, OR 97281-3700.

http://www.oregon.gov/pers/EMP/Pages/GASB.aspx

Deferred Compensation Plan

A deferred compensation plan is available to employees wherein they may execute an individual agreement with the Port for amounts earned by them to not be paid until a future date when certain circumstances are met. These circumstances are: termination by reason of death, disability, resignation, or retirement. Payment to the employee will be made over a period not to exceed 15 years. The

deferred compensation plan is one which is authorized under IRC Section 457 and has been approved in its specifics by a private ruling from the Internal Revenue Service. The assets of the plan are held by the administrator for the sole benefit of the plan participants and are not considered assets or liabilities of the Port.

B. Post-Employment Benefits Other Than Pensions (OPEB)

Plan Description – A program is provided for the availability for retirees and their spouses to purchase healthcare insurance at the same group rates as the Port pays for its active employees. No plan has been established to account for this activity. Since the former employees' service has caused this benefit to be available, generally accepted accounting principles requires that the costs of these services be calculated and shown as a cost of operations and/or as a liability for providing a future benefit in the financial statements. Disclosure of the liability is mandatory.

Funding Policy – The benefits from this program are paid by the Port on a self-pay basis and the required contribution is based on projected pay-as-you go financing requirements. There is no obligation on the part of the Port to fund these benefits in advance.

Actuarial Methods and Assumptions – The Port engaged an actuary to perform an evaluation as of July 1, 2017 using entry age normal, level percent of salary Actuarial Cost Method. The Single Employer OPEB Plan liability was determined using the following actuarial assumptions, applied to all periods including the measurement.

Discount Rate per Year - 3.87% General Inflation Rate per year - 2.5% Salary Scale per year - 3.5%

Health Care cost Trends:

Year	Trend	Year	Trend
2017	0.50%	2038-2043	6.00%
2018	5.75	2044-2046	5.75
2019	5.25	2047-2054	5.50
2020-2030	5.00	2055-2064	5.25
2031-2033	5.25	2065-2066	5.00
2034	5.50	2067-2069	4.75
2035	5.75	2070-2072	4.50
2036-2037	6.25	2073+	4.25

Mortality rates were based on rates adopted by the Oregon Public Employees Retirement System (PERS) for its December 31, 2016 actuarial valuation of retirement benefits.

Turnover rates were based on percentages developed for the valuation of benefits under Oregon PERS and vary by years of service.

Disability rates were not used.

Retirement rates were based on Oregon PERS assumptions. Annual rates are based on age, Tier 1/Tier 2, OPSRP, duration of service, and employment classification.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

The Port does not pay for any explicit retiree OPEB under GASB 75.

Changes in Total OPEB Liability

Balance as of June 30, 2018	\$ 26,109
Changes for the Year:	
Service Cost	2,388
Interest	1,020
Changes of Assumptions or Other Input	(725)
Benefit Payments	(25)
Net Change for the Year	 2,658
Balance as of June 30, 2019	\$ 28,767

Sensitivity of the Total Other Post-Employment Benefit Liability to Changes in Discount and Trend Rates – The following presents the total other post-employment benefit liability (TOL), calculated using the discount rate of 3.87 percent, as well as what the liability would be if it was calculated using a discount rate 1-percentage-point lower (2.87 percent) or 1-percentage-point higher (4.87 percent) than the current rate. A similar sensitivity analysis is then presented for changes in the healthcare cost trend assumption:

June 30, 2019	1%	Current	1%
	Decrease	Discount Rate	Increase
Total OPEB Liability	\$31,529	\$ 28,767	\$26,213
June 30, 2019	1%	Current	1%
	Decrease	Trend Rate	Increase
Total OPEB Liability	\$25,258	\$ 28,767	\$32,873

	Deferre	d Outflow	Deferred Inflow	
	of Re	esources	of F	Resources
Differences between expected and actual experience	\$	-	\$	-
Changes of assumptions or inputs		-		(1,725)
Benefit Payments		633		
	\$	633	\$	(1,725)

Amounts reported as deferred outflow or inflow of resources related to OPEB will be recognized in OPEB expense as follows:

Year ending June 30,	A	mount
2020	\$	(468)
2021		(468)
2022		(468)
2023		(266)
2024		(55)
Total	\$	(1,725)

C. Risk Management

The Port is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Port carries commercial insurance. There have been no settlements in the past four fiscal years that exceeded insurance coverage.

D. Contingent Liability

The Port was notified in January, 2018 by a waterfront area landowner that a storm water drain pipe that runs under the landowner's building appears to be broken and damaging the landowner's property. The drain pipe runs from the east under other waterfront properties and buildings westerly to the landowner's property, and then runs northwest from the landowner's property to the Columbia River.

The City of Hood River conveyed the landowner's property to the Port in 1967. In 1968 the Port and City amended the 1967 deed language to address respective responsibilities of the Port and City if the drain pipe under landowner's property causes damage to the property or needs to be repaired or relocated. In 1968, the Port also sold landowner's property to the landowner.

After the landowner notified the Port of the drain pipe issue, the landowner hired engineers to analyze the drain pipe and property damage issues. Based on their engineer studies, the landowner has claimed the Port and/or City are liable for landowner property damages and related costs. The Port and City have analyzed the drain pipe condition, which is hampered by a large amount of sediment being in the drain pipe and the pipe in the vicinity of the tenant has collapsed. The Port

has reviewed the historical information related to the drain pipe and those property documents where the drain pipe is located.

As of the date of this report, per communication from the Port's attorney, there is sufficient information to determine that the drain pipe is owned by the City of Hood River, however, there is insufficient information to determine the cost to repair the drain pipe at the location and any liability exposure the Port may have. It is the City's initial review that the entire infrastructure of storm line be rebuilt since the current infrastructure is past its useful life. It is impossible to determine at this point in time whether the Port will be responsible to pay, separately or with the City contribution, for pipe replacement at the landowner's property or for the entire line replacement. If the Port is required to pay costs itself, to replace and relocate the entire underground pipe system those costs could have a significant financial impact to the Port.

Currently, issues related to the placement and the affect the pipe has on the landowner's property, and legal issue affecting the Port, the City, the landowner and possibly other property owners, are being evaluated to determine the nature and extent of legal obligations and Port financial exposure.

There are no other contingent liabilities with the Port.

E. Property Tax Limitations

The State of Oregon has a constitutional limit on property taxes for schools and non-school government operations. The limitation provides that property taxes for non-school operations are limited to \$10 to each \$1,000 of property market value. This limitation does not apply to taxes levied for principal and interest on general obligation debt.

An additional limit reduces the amount of operating property tax revenues available. The reduction was accomplished by rolling property values for 1997-98 back to their 1995-96 values less 10% and limiting future tax value growth of each property assessed value to no more than 3% per year, subject to certain exceptions. Taxes levied to support bonded debt are exempted from the reductions. The Constitution also sets restrictive voter approval requirements for most tax and many fee increases, as well as new bond issues.

F. Tax Abatements

As of June 30, 2019, the Port of Hood River potentially had tax abatements through various state allowed programs that impacted levied taxes. Based on information available from the county as of the date of issuance of these financial statements, there were no material abatements disclosed by the county for the year ended June 30, 2019 for any program covered under GASB 77.

PORT OF HOOD RIVER HOOD RIVER COUNTY, OREGON

INDEPENDENT AUDITORS' REPORT REQUIRED BY OREGON STATE REGULATIONS

PAULY, ROGERS, AND Co., P.C. 12700 SW 72nd Ave. Tigard, OR 97223 (503) 620-2632 (503) 684-7523 FAX www.paulyrogersandcocpas.com

November 21, 2019

Independent Auditors' Report Required by Oregon State Regulations

We have audited the basic financial statements of the Port of Hood River as of and for the year ended June 30, 2019, and have issued our report thereon dated November 21, 2019. We conducted our audit in accordance with auditing standards generally accepted in the United States of America.

Compliance

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of compliance with certain provisions of laws, regulations, contracts, and grants, including the provisions of Oregon Revised Statues as specified in Oregon Administrative Rules 162-10-000 through 162-10-320 of the Minimum Standards for Audits of Oregon Municipal Corporations, noncompliance with which could have a direct and material effect on the determination of financial statements amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion.

We performed procedures to the extent we considered necessary to address the required comments and disclosures, but were not limited to the following:

- Deposit of public funds with financial institutions (ORS Chapter 295)
- Indebtedness limitations, restrictions and repayment.
- Budgets legally required (ORS Chapter 294).
- Insurance and fidelity bonds in force or required by law.
- Authorized investment of surplus funds (ORS Chapter 294).
- Public contracts and purchasing (ORS Chapters 279A, 279B, 279C)

In connection with our testing nothing came to our attention that caused us to believe the Port of Hood River was not in substantial compliance with certain provisions of laws, regulations, contracts, and grants, including the provisions of Oregon Revised Statutes as specified in Oregon Administrative Rules 162-10-000 through 162-10-320 of the Minimum Standards for Audits of Oregon Municipal Corporations.

OAR 162-10-0230 Internal Control

In planning and performing our audit, we considered internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of internal control over financial reporting.

This report is intended solely for the information and use of the Board and management and the Oregon Secretary of State and is not intended to be and should not be used by anyone other than these parties.
